## Cotton Picker Spindle Cleaner

Date Issued: April 21, 2015

Date Revised: February 19, 2013

### Typical Product Data

<u>Test Description</u>	<u>Method</u>	<u>Specifications</u>
Viscosity @ 40 °C, cSt	ASTM D445	21.0 +/-10%
Color, max	ASTM D1500	3
Pounds per gallon	ASTM D287	7.754
Emulsion, 1 in 70 dilution	---	Stable
Features	---	Non-Flammable Non-Corrosive Inhibits Rust

\*Cotton Picker Spindle Cleaner concentrate contains emulsifiers that will form oil-in-water type emulsions, as well as other additive materials that provide rust protection, minimize the tendency to foam, effectively emulsifying with hard water and inhibiting bacterial growth.

**Mixing:** *Cotton Picker Spindle Cleaner must be blended by adding it to the water!* For best results fill tank at least half (1/2) full of water, add the Spindle Cleaner then fill the rest of the way with water. It is best to have circulation while the final water is being added.

**Storage:** Drums and pails of Cotton Picker Spindle Cleaner concentrate should be stored to avoid possible contamination with water. If small amounts of water get into a container of Cotton Picker Spindle Cleaner concentrate an inverted emulsion will form resulting in gobs or curds of thick slimy material. Place drums on their sides with bungs in horizontal position if it is necessary to store outdoors.
