

Are you ready to take your preventive maintenance program to the next level...

RIGHT PRODUCT ✓

With the help of your people, we will perform a lube survey that documents all of your equipment to ensure you get the right product.

Some things we would document..

-  **MAKE, MODEL, EQUIPMENT ID, ETC.**
-  **FUEL TYPE**
-  **TANK / RESERVOIR CAPACITY**
-  **OEM RECOMMENDED LUBRICANT SPECIFICATIONS**
-  **CURRENT LUBRICANT**
-  **OUR RECOMMENDED PRODUCT**
-  **OPERATING ENVIRONMENT**

RIGHT PLACE ✓

By implementing correct storage and handling practices for products and labels on reservoirs and containers, we aim to significantly reduce the risk of placing the wrong product in the wrong location.

RIGHT TIME ✓

By implementing a streamlined oil analysis program, our goal is to enhance drain intervals to maximize the efficiency of your lubricants while maintaining product quality.

RIGHT WAY ✓

We will work with you and your team through our vendors to make sure your personnel is trained and ready to put in to place any best practices that you and our team implement.
